

September 20, 2012

To Whom it May Concern:

Brodey Wagner is a six month old (DOB 3/15/2012) male castrated golden retriever owned by Patricia and Thomas Wagner. He is under the care of Hunting Ridge Animal Hospital in Sharon Center, OH. On September 13, 2012, Brodey was seen for lameness of his right hind leg. Upon examination, both hips clicked on flexion of the hip joint. Radiographs performed under sedation on September 20, 2012 confirm hip dysplasia. Both hips are subluxated on the radiographs due to shallow acetabulums, the right hip is more affected than the left, however both hips are dysplastic.

Sincerely,

A handwritten signature in cursive script that reads "Heather A. Riley, DVM". The signature is written in dark ink and is positioned above the printed name.
